

A satellite image of a coastal region, likely the Pacific Northwest, showing a large body of water and a rugged coastline. A yellow polygon highlights a specific area in the water, labeled "Pelican Island and nearby islands". The land to the left is dark green and brown, indicating dense vegetation and rocky terrain. The water shows varying shades of blue and green, suggesting different depths and possibly submerged reefs or sandbars. The highlighted area is a small, irregularly shaped island or group of islands.

Pelican Island and nearby islands
